Introduction

I started diving into the front-end after being a Computer Engineering graduate from HKUST as I think front-end is one of the promising technologies besides blockchain, AI, data analysis in IT. In the beginning, I learnt the fundamentals of HTML5, CSS3 and JavaScript. Now, I am picking up the frameworks and libraries that a professional front-end developer must familiar to and React is the one I currently pay most attention to. Also, gaining hands-on experience is my major way to acquire the skills. To become a professional front-end developer, I focus on implementing secure, stable and reliable code.

EXPERIENCE

- ♦ Fresh Graduation

EDUCATION

- ♦ Hong Kong University of Science and Technology (HKUST)
Bachelor of Engineering (Computer Engineering) – 2019

PORTFOLIO-WEBSITE

- ♦ <https://kyleungat.github.io>

Knowledge – Front-end

- ♦ HTML5
- ♦ CSS3
- ♦ JavaScript
- ♦ ES6
- ♦ Git
- ♦ Webpack
- ♦ Npm
- ♦ React
- ♦ Responsive

- ♦ HTTP
 - ♦ Restful
 - ♦ Bootstrap
 - ♦ SCSS
 - ♦ Redux
-

Knowledge – React / Redux

- ♦ React Router
 - ♦ Redact-Redux
 - ♦ React-icon
 - ♦ Redux-thunk
 - ♦ React Transition Group
 - ♦ Styled component
-

Portfolio Webpages

- ♦ Weather
